AdComNet Modbus gateway

ACN-GW501-MRTU-0200

The Modbus gateway enables communication between AdComNet bus and Modbus-based solutions. Get more information now!

Performance features

+ Universal gateway for connecting AdComNet to a Modbus network

+ 200 user-configurable Modbus inputs (alarm, fault, LT)

+ 200 user-configurable Modbus outputs (alarm, fault, OPEN signal)

+ Ability to connect to other fields such as building management system or touch panel via Modbus

+ Functions within and outside of the segment remain intact, even if other segments have a defect

+ Power supply possible via SHEV control panel

+ Simple integration into the AdComNet network

+ Additional battery capacity of 1.2 Ah required

Technical data

	ACN-GW501-MRTU-0200
W x H x D	86 x 58 x 52 mm
Diameter	0 mm
Weight	0.12 kg
Art. No.	30.554.20

Example of application

Wind rain sensor

Touch panel

Drive

Modbus gateway

SHEV control panel

I/O module

Connection module

Fire detector

SHEV operation panel

BACnet, Lon, KNX etc.

Ventilation button

BI501-USB

Only for programming
