

LDx-1400-5-ACB

The louvre drives are available in more than 1500 colours, so can always be matched with the building architecture. Equipped with an integrated 230 V power supply unit.

Performance features

- + Max. force of pressure and tensile force of 1400 N and 1800 N
- + Holding force of 5000 N for very large louvre windows
- + Direct control via 230 V AC
- + Louvre window drive can be adapted for all common louvre manufacturers (such as EuroLam, Fieger, HAHN, NACO, Schneider + Nölke)
- + Centrally supported driver position
- + Developed based on EN 12101-2
- + Can be used for openings for smoke exhaust and for daily ventilation
- + With BSY+ motor and synchronised electronics controlled via microprocessor
- + With a sound pressure level of $L_pA \leq 45$ dB(A), the drive is among the quietest of its class
- + Corrosion-protected drive components
- + Programmable drive functions and different drive parameters
- + Additional passive and active anti-trap protection system for the main closing edges with reversing function
- + Integrated ACB (Advanced Communication Bus) bus interface with Modbus RTU protocol
- + The drive is integrated directly via open bus communication through the ACB (Advanced Communication Bus), e.g. in a building management system
