

Expansion modules ACB gateway on BSY+ 230
V AC

ACB-BSY+-GW1-230

With the ACB BSY+ Gateway ACB-BSY+-GW1-230, 230 V BSY+ drives can be integrated into an ACB network. Find out more now!

Performance features

- + Interface module between building management system or D+H control panel (CPS-M1) and a 230 V AC BSY+ drive group
- + Expands the drive functions, for example, to include functions of precise position control and virtual group formation
- + Enables the use of real drive positions, for example, for OPEN and CLOSED signals
- + Fault message of the individual BSY+ group
- + No special drive notification or configuration required
- + Galvanic isolation between the input signal and output signal
- + For installing on-site junction box

Technical data

ACB-BSY+-GW1-230

W x H x D	50 x 48 x 19 mm
Diameter	0 mm
Weight	0.07 kg
Art. No.	30.555.20
