

PS-VE1

Using the PS-VE1, 24 V drives can be operated optimally through 230 V activation. The power supply unit provides up to 1 A of drive current.

Performance features

- + External compact power supply unit, 230 V AC
- + Activation, e.g. using 230 V AC ventilation button
- + For controlling 24 V DC drives
- + Surface-mounted design
- + Up to 1 A total drive current, output voltage un stabilised

Technical data

PS-VE1

Supply	230 V AC / +10 % ... -15 % / 50 Hz
Performance	31 W / 36 VA
Output	24 V DC / 1 A
Mode of operation	Short-time duty 20 % duty cycle
Type of protection	IP 66
Temperature range	0 °C ... +60 °C
Housing	Polypropylene
Colour	Light grey (~ RAL 7035)
W x H x D	180 x 130 x 77 mm
Weight	0.8 kg
Art. No.	30.242.10

Example of application
