

Expansion modules Gateway BACnet to
Modbus/ACN

BACnet Modbus Gateway

This allows D+H control panels and drives with ACB technology to be connected to BACnet-based building management systems. Programming using SCS software.

Performance features

- + High-performing BACnet/Modbus gateway with 100 freely configurable channels (BACnet objects)
- + Connection to other fields such as BMS via BACnet possible
- + Easy import of the project image of the CPS-M1 from the D+H software SCS into Intesis Maps with automatic assignment between BACnet objects and Modbus registers
- + The ACN-GW501-MRTU-0200 Gateway is required for a connection to the CPS-M1

Technical data

BACnet Modbus Gateway

W x H x D	90 x 88 x 56 mm
Diameter	0 mm
Weight	0.18 kg
Art. No.	70.602.20
