

ACN-IO501

Our I/O module enables communication between the AdComNet bus and commercially available peripherals via digital inputs and isolated contacts.

Performance features

- + 8 user-configurable inputs (alarm, fault, LT)
- + 8 user-configurable outputs (alarm, fault, OPEN signal)
- + 1 line for the connection of fire detectors and SHEV operation panels
- + Ability to connect to other fields such as fire alarm system / building management system / weather sensor system
- + LED display of input and output states
- + Pre-configured functions for simple integration into the AdComNet network
- + Functions within and outside of the segment remain intact, even if other segments have a defect
- + Manual signal triggering of inputs using integrated buttons
- + Power supply possible via SHEV control panel
- + Additional battery capacity of 1.2 Ah required

Technical data

ACN-IO501

W x H x D	157 x 115 x 59 mm
Diameter	0 mm
Weight	0.37 kg
Art. No.	30.553.80

Example of application
